

Company introduction

Established in 2016

Hebei Ruitai Glass Insulator Manufacturing Co., Ltd. is a professional and reliable supplier specializing in toughened glass insulators. The company has complete industry qualifications, holds ISO quality management system certification, and all products are verified by full sets of authoritative test reports, ensuring stable performance, consistent quality and full compliance with international industry standards.

RUITAI Power Insulator Series

- 40 – 550 kN standard types
- 70 – 300 kN anti-pollution types
- 70 – 240 kN aerodynamic types
- 70 – 100 kN earth-wire types
- 70 – 240 kN double-shed types

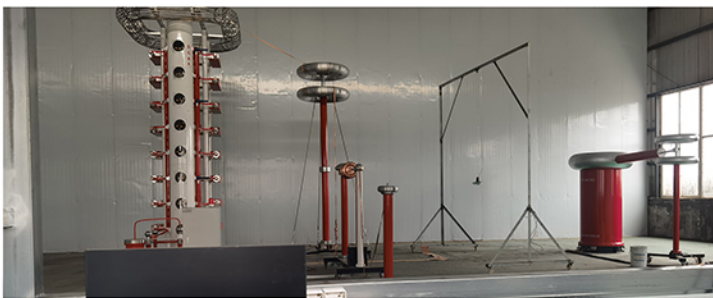

These products are widely used in high-voltage, extra-high-voltage, and ultra-high-voltage transmission lines with voltage levels from 10 kV to 500 kV.

 Contact information

Product Highlights 01

Compact, lightweight yet ultra-strong – Lower line costs & stable operation with glass insulators!

Under identical specifications, glass insulators are far smaller and lighter than porcelain ones, saving metal fittings and reducing overall power line construction costs.

 Contact information

Product Highlights 02

Toughened glass built to last – High strength, arc resistance & anti-aging performance, safeguarding power transmission lifelines!

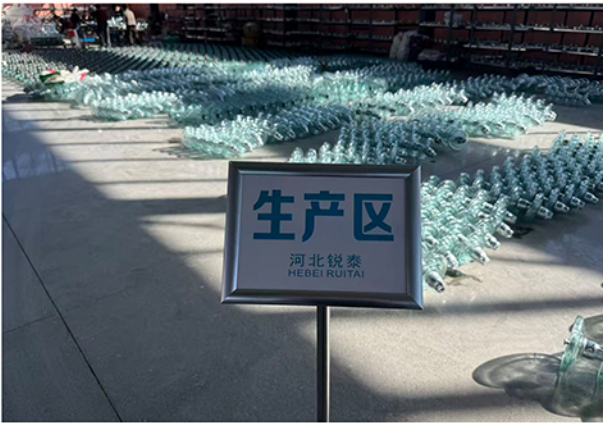

Glass insulators feature outstanding mechanical strength, great resistance to power-frequency electric arcs and vibration, excellent self-cleaning properties and strong anti-aging capability.

 Contact information

Product Highlights 03

Maintenance-free, zero hidden dangers– Glass Insulators escort grid safety!

No regular live preventive tests required during operation. Minimal surface leakage current enables long-term maintenance-free service.

Contact information

Product Highlights 04

No more pole climbing, no more maintenance hassle –
Self-shattering warning for labor & cost savings!

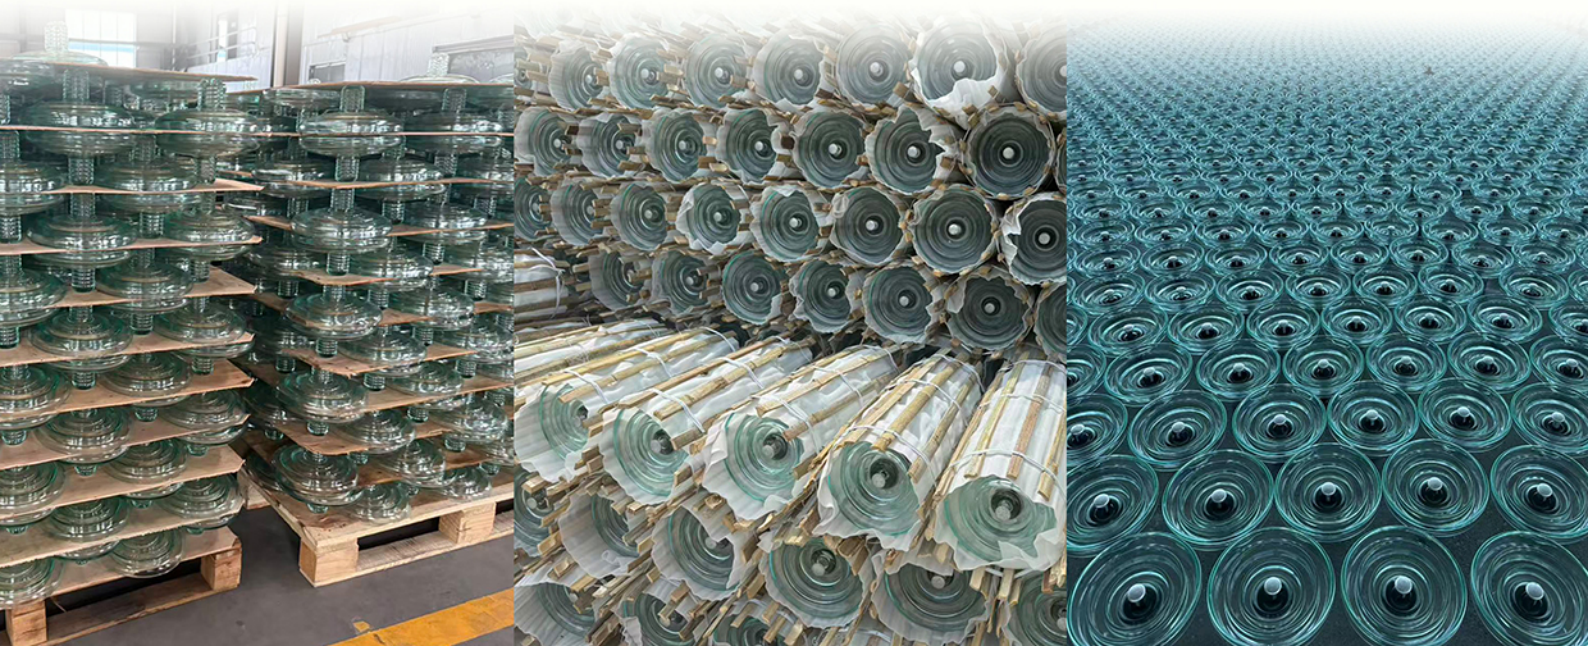

The annual self-breakage rate stands merely at 0.02–0.04%.
Piece-by-piece inspection is eliminated, greatly cutting
power line maintenance costs.
